

INCOBRA Webinar #9

Horizon 2020 open calls on Risk Governance of Nanotechnology &
Nanoinformatics (NMBP-13-2018 & NMBP-14-2018)

Opportunities for EU-BR cooperation in the nanotech sector

The INCOBRA project has received funding from the European Union's Horizon 2020 Research and Innovation programme, under the Grant Agreement number 692520. This publication reflects only the author's view and the Commission is not responsible for any use that may be made of the information it contains.

INCOBRA Webinar #9

Dear colleague,

On behalf of INCOBRA consortium, we would like to invite you to join our ninth webinar:

Horizon 2020 open calls on Risk Governance of Nanotechnology & Nanoinformatics (NMBP-13-2018 & NMBP-14-2018). Opportunities for EU-BR cooperation in the nanotech sector

which is taking place on the **7th December 2017, at 2.30pm GMT** (3.30pm CET and 12.30am Brasilia's time). The webinar will last 75 minutes and will be held in English.

This webinar will present two call topics now open under the H2020 call on Foundations for Tomorrow Industry (H2020-NMBP-TO-IND-2018-2020):

- Risk Governance of Nanotechnology (NMBP-13-2018)
- Nanoinformatics: from materials models to predictive toxicology and ecotoxicology (NMBP-14-2018)

The call covers different aspects, including the support for a framework to ensure public safety in nanotechnology. In this regards, the overall challenge is to establish a suitable form of nanotechnology risk governance and to ensure that beyond the state of the art technologies are accepted by stakeholders (civil society, industry, regulators).

This requires working on three different layers: (i) a scientific research layer for sound foundations, (ii) a regulatory research layer to validate and translate the scientific findings into appropriate regulatory frameworks and implementation, and (iii) a market layer dealing with the daily management of risks and safety. These three distinct layers should be integrated through actions for risk governance, risk assessment and safe by design. Notably nano-informatics approaches offer good chances for innovation.

Re the international dimension of these calls:

- Consistency of science based risk management approaches in all EU Member States and synergy with similar actions internationally is one of the expected impact of NMBP-13-2018.
- International cooperation is particularly encouraged for NMBP-14-2018, in line with the strategy for EU international cooperation in research and innovation (COM(2012)497).

The webinar will present the 2 open call topics in all their aspects (objectives, mechanism, eligibility criteria, evaluation process, benefits), will then provide an insight on the Brazilian landscape on nanotech, and will leave room for interactive Q&A sessions.

The webinar will close with a pitching session aimed at showcasing organizations interested in the calls and looking for partnerships. Each organization has 3 minutes and a max of 3 slides.

For those organisations interested in the pitching session, please send us an email by December 4th.

Please specify:

- Name of your organization,
- contact person in charge of the pitch,
- contact details,
- logo,
- topic you are interested in and why (3 rows max),
- slides if you want to use them.

Send your email to: incobra@incobra.eu

Moderators (TBC):

Paloma Tejedor Jorge, CSIC

Chiara davalli, EBN

Speakers (TBC):

- **EC**
- **API Nano, Cluster**
- **Fundação de Amparo à Pesquisa e Inovação do Estado de Santa Catarina – FAPESC**

About INCOBRA Webinar #9

This webinar will present two call topics now open under the H2020 call on Foundations for Tomorrow Industry (H2020-NMBP-TO-IND-2018-2020):

- Risk Governance of Nanotechnology (NMBP-13-2018)
- Nano-informatics: from materials models to predictive toxicology and ecotoxicology (NMBP-14-2018)

Moreover the webinar will provide some insights on the nanotech sector in Brazil, and will give the chance to 6 organizations to pitch themselves so to facilitate partner searching for the open calls.

Programme

- ✓ 14:30-14:40 Introduction about the webinar > Paloma Tejedor Jorge, CSIC
- ✓ 14:40-14:55 H2020 call topics NMBP-13 and NMBP-14, EC
- ✓ 14:55-15:00 Q&A > Chiara Davalli, EBN
- ✓ 15:00-15:10 The Brazilian co-funding mechanism > FAPESC Santa Catarina
- ✓ 15.10-15:20 The nanotech sector in Brazil > API Nano Cluster
- ✓ 15:20-15:25 Q&A > Chiara Davalli, EBN
- ✓ 15:25-15:45 Pitching session (max 6 organizations)

Consortium
